Dr. Miles' Heart Cure CAB

attorney of Belfast, N. Y., writes: I was discharged from the army on account of ill health, and suffered from heart trouble ever since. I frequently had fainting and smothering spells. My form was bent as a man of 80. I constantly wore an overcoat, even in summer, for fear of taking cold. I could not attend to my business. My rest was broken by severe pains about the heart and left shoulder. Three years ago I commenced using Dr. Miles Heart Cure, notwithstanding I had used so much patent medicine and taken drugs from doctors for years without being helped. Dr. Miles' Heart Cure restored me to health. It is truly a wonderful medicine and it affords me much pleasure to recommend this rem edy to everyone."

MERRIMAC'S HEROES

Lieutenant Hobson and His Companions Not Yet Liberated.

SURRENDER OF SANTIAGO

Report Reaches Cape Haytien In Roundabout Way - Stories of a Mysterious Spanish Warship In Cuban Waters Not Credited at Washington-Sampson Said to Have Enough Marines With Him to Make a Landing - Greely Prohibits the Cabling of News of Any Movements of Troops or Ships - Commodore Schley's Tribute to Hobsen.

Off Santiago, June 8, via Mole St. Nicholas, June 10.-The United States cruiser Marblehead and the auxilliary cruisers Yankee and St. Louis were successful in cutting the cable at Guanatanamo yesterday after firing on a Spanish gunboat and the oldfashioned fortifications there. Cuba is thus cut off from all communication with the outside world.

The army of invasion is eagerly awaited and everything is ready for its reception. The blockade has been uneventful since Monday.

Lieutenant Hobson and his heroic companions in the exploit of sinking the collier Merrimac across the entrance to the harbor of Santiago may not be released for some time. Admiral Cervera sent a flag of truce to Admiral Sampson yesterday with a message that the prisoners were in the hands of the military authorities and that their cases had been referred by the military governor of Santiago to Governor General Blanco. The plan of exchange submitted by Admiral Sampson to Admiral Cervera is thus temporarily frustrated.

Report Received at Cape Haytien That the Town Has Surrendered.

Cape Haytien, Hayti, June 10. - A man who has arrived here in a schooner from Turks island, one of the Bahamas, and about 110 miles north of Havti. says it was reported there on Tuesday that Santiago de Cuba had been taken by the Americans. Cable communication between Cape Haytien and Cuba is still interrupted.

MOVEMENT OF TROOPS.

Government Successful In Keeping the Whereabouts of Shafter a Secret.

Washington, June 10.-It has become apparent that the war department, through the energetic officers of its censors, has succeeded entirely in its purpose to keep the movements of the United States troops a secret, for, beyoud question, it is impossible to learn here whereabouts of the United States troops which have been for weeks gathering under command of General Shaf-

Now is the critical instant. Will the patient give up in despair and let the angel of disease drag him away from wife and family and children, or will he grasp the hand of the angel of life in one more supreme effort for restoration? Are you standing between the contending angels?

Mrs. Emily Howe, of 7 Park Avenue, Chicago, Ills., writes: "About two years ago my son was afflicted with what seemed to be symptoms of consumption. I purchased three bottles of Dr. Pierce's Golden Medical Discovery and it cured him.

stories of the appearance of a mysterious warship in Cuban waters floated through the navy department yesterday. The officers quickly condemned them, declaring the belief that if the boats were Spanish they were nothing more than small armed launches and not to be feared by any number of transports convoyed by such fine gunboats as the Helena and Bancroft.

But, when these stories reached the war department they were received with a different spirit. Nothing is more helpless in warfare than an unarmored troop transport full of soldiers. She would fall an easy victim to the smallest gunboat and the soldiers, knowing their weakness in this respect, are loth to undertake to cross the Florida straits until these disagreeable visitors have been removed from the pathway. Without respect to the character of the strange crafts that are said to be dodging the blockaders at Havana, they will be removed from the scene of action in short notice, and it is understood that Sampson has been made acquainted with the situation and will be expected fo redeem his promise to provide safe conduct to the army when called upon. He has ample force to conduct the operations at Santiago to a successful issue and will spare vessels of any power desirable for use in the Florida straits.

It was pointed out by a naval officer that the admiral, since the arrival of the marine battalion on the Panther, has at his disposal what he may regard as a sufficient force of men to capture Santiago even before the troops arrive. The 600 marines on the Panther, added to the marines already with the fleet, would make a total of about 1,500 men. Without impairing the efficiency of his ships Admiral Sampson could spare

1,000 blue jackets for a landing party, and with this total force of 2,500 men (if the insurgents who have been armed by the United States government do their share) it seems possible for Sampson to capture Santiago at short notice. There seemed to be a very decided air of expectation last evening among the officials who are acquainted with the government's plans in the campaign that almost warranted a conclusion that an engagement of some kind was taking

Hobson's Name Will Live Just as Long

History does not record an act of finer heroism than that of the gallant men who are prisoners over there. I watched the Merrimac as she made her way to the entrance of the harbor and my heart sank as I saw the perfect hell of fire that fell upon those devoted men. I did not think it was possible one of them could have gone through it alive. They went into the jaws of death. It was Balaklava over again without the means of defense which the light brigade had. Hobson led a forlorn hope without the power to cut his way out. But fortune once favored the brave and I hope he will have the recognition and promotion he deserves. His name will live as long as the heroes of the world are remembered.

SAN JUAN AND SANTIAGO.

Both Cities to Be Attacked About the Same Time.

Washington, June 10.-The war story of the day is that the expedition of 27,000 soldiers, which has sailed from Tampa, will divide on reaching the waters of eastern Cuba, one part (10,000 strong) going with Admiral Sampson to capture ture San Juan, and the other (composed of 17,000) proceeding to Santiago to cooperate with Commodore Schley. The two cities are to be attacked at about the same time, and the president is confident they will be in the possession of the United States by the middle of next

week. Both branches of the expedition should reach their respective destina. tions by Monday if they have smooth sailing and no hitch occurs in the arrangements. Admiral Sampson will leave the heavier part of the fleet at Santiago, but will take with him a suf-

NEGOTIATIONS FOR PEACE

Senor Sagasta-Minister of Marine Sent to Cadiz to Hurry Admiral Camara's Fleet to Sea - London Press Advises Spain to Recognize the Inevitable.

Madrid, June 10 .- The press generally and public opinion are outspoken on the disagreeable news from the Philippines, bitterly blaming the remissness of the present government without throwing the whole responsibility upon it. Public feeling, though aroused, is displaying an ominious calmness, waiting to know the worst, but when that is known, there will be developments. It is generally believed that important decisions were taken at the cabinet council.

The cabinet council was occupied with a long discussion as to the military situation in the Philippines. General Correa, minister of war, denied that Captain General Augusti's position was deperate, and Senor Sagasta added that Manila had means of defence until the arrival of reinforcements.

The council then adopted important measures, which are kept secret. Captain Aunon, minister of marine, was authorized to take whatever measures he considers necessary with reference to the Philippines, and Senor Puigcorver. minister of finance, being authorized to come to an agreement with the leaders of the majority in the chamber for the passage of the budget.

Senor Sagasta declared that the government had "no intention of taking the initiative in negotiations for peace.' He said he was not aware that any power was disposed to do so.

Atlanta, June 10 .- An attempt was made on the night of May 29 to enter will start together under sealed orders the magazine at Fort St. Philip on the Mississippi, 65 miles below New Orleans. The affair did not become known till last evening.

The sentinel on the parapet on the Tenth battery heard a suspicious noise in the direction of the magazine and on creeping up to the house saw two men trying to force the locks. He challenged them, but they ran, and, although fired at, managed to escape, one of the men sending a shot through the sentry's sleeve as he left. The sentinel pursued the two men and as he neared the steps leading to the landing a third man stepped out and struck him with a bar of iron, felling him to the ground. The guards, aroused by the shooting, came on the scene hastily, but the three men escaped in a boat down the river. The

sentry was seriously injured. SYSTEM OF TRADING

Prevails Among Prisoners of the Ohio Penitentiary.

Columbus, O., June 10. - Charles Kline, who has attracted notoriety by twice escaping from the steel cage constructed under the penitentiary hospital for Ira Marlatt, has confessed how the watch was secured. He said that he had received the watch from A. P. Duncan, serving a 10-year sentence and employed at the stable. Kiine's story was found to be true, Duncan having received it from Johnny Beall for taking care of his horse, who in turn had received it from A. C. Ady of this city, who was discharged several days ago. The watch was worth about \$2 and Kline had sold it to another prisoner in the glove shops for \$5. The latter complained that there was trafficking in that kind of goods and all indications pointed to a regular system of trading.

Government Successful In Keeping the Whereabouts of Shafter a Secret. Washington, June 10.-It has become apparent that the war department, through the energetic officers of its censors, has succeeded entirely in its purpose to keep the movements of the United States troops a secret, for, beyond question, it is impossible to learn here whereabouts of the United States troops which have been for weeks gathering under command of General Shaf-

stories of the appearance of a mysterious warship in Cuban waters floated through the navy department yesterday. The officers quickly condemned them, declaring the belief that if the boats were Spanish they were nothing more than small armed launches and not to be feared by any number of transports convoyed by such fine gunboats as the Helena and Bancroft.

But, when these stories reached the war department they were received with a different spirit. Nothing is more helpless in warfare than an unarmored troop transport full of soldiers. She would fall an easy victim to the smallest gunboat and the soldiers, knowing their weakness in this respect, are loth to undertake to cross the Florida straits until these disagreeable visitors have been removed from the pathway. Without respect to the character of the strange crafts that are said to be dodging the blockaders at Havana, they will be removed from the scene of action in short notice, and it is understood that Sampson has been made acquainted with the situation and will be expected fo redeem his promise to provide safe conduct to the army when called upon. He has ample force to conduct the operations at Santiago to a successful issue and will spare vessels of any power desirable for use in the Florida straits.

It was pointed out by a naval officer that the admiral, since the arrival of the marine battalion on the Panther, has at his disposal what he may regard as a sufficient force of men to capture Santiago even before the troops arrive. The 600 marines on the Panther, added to the marines already with the fleet, would make a total of about 1,500 men. Without impairing the efficiency of his ships Admiral Sampson could spare

1,000 blue jackets for a landing party, and with this total force of 2,500 men (if the insurgents who have been armed by the United States government do their share) it seems possible for Sampson to capture Santiago at short notice. of expectation last evening among the officials who are acquainted with the government's plans in the campaign that almost warranted a conclusion that an engagement of some kind was taking

SAN JUAN AND SANTIAGO.

Both Cities to Be Attacked About the Same Time.

Washington, June 10.-The war story of the day is that the expedition of 27,000 soldiers, which has sailed from Tampa, will divide on reaching the waters of eastern Cuba, one part (10,000 strong) going with Admiral Sampson to capture ture San Juan, and the other (composed) of 17,000) proceeding to Santiago to cooperate with Commodore Schley. The two cities are to be attacked at about the same time, and the president is confident they will be in the possession of the United States by the middle of next

week. Both branches of the expedition should reach their respective destina. tions by Monday if they have smooth sailing and no hitch occurs in the arrangements. Admiral Sampson will leave the heavier part of the fleet at Santiago, but will take with him a suf-

MILITARY SITUATION

In Philippines Discussed by Cabinet Council.

NEGOTIATIONS FOR PEACE

Will Not Be Initiated by Spain, Says Senor Sagasta-Minister of Marine Sent to Cadiz to Hurry Admiral Camara's Fleet to Ses - London Press Advises Spain to Recognize the Inevitable.

Madrid, June 10 .- The press generally and public opinion are outspoken on the disagreeable news from the Philippines, bitterly blaming the remissness of the present government without throwing the whole responsibility upon it. Public feeling, though aroused, is displaying an ominious calmness, waiting to know the worst, but when that is known, there will be developments. It is generally believed that important decisions were taken at the cabinet council.

The cabinet council was occupied with long discussion as to the military situation in the Philippines. General Correa, minister of war, denied that Captain General Augusti's position was deperate, and Senor Sagasta added that Manila had means of defence until the arrival of reinforcements.

The council then adopted important measures, which are kept secret. Captain Aunon, minister of marine, was authorized to take whatever measures he considers necessary with reference to the Philippines, and Senor Puigcorver, minister of finance, being authorized to come to an agreement with the leaders of the majority in the chamber for the passage of the budget.

Senor Sagasta declared that ernment had "no intention of taking the initiative in negotiations for peace.' He said he was not aware that any power was disposed to do so.

The government has received no official dispatch of a new bombardment at Santiago. At the termination of the cabinet

palace where he had an hour's confernce with the queen regent. Captain Aunon, minister of marine, started for Cadiz last night. All the

ministers accompanied him to the railway station. He will remain at Cadiz until Admiral Camara's squadron is ready to sail, General Correa in the meantime fulfilling his duties at the ministry of marine. The 15 vessels forming the squadron

squadron is well out to sea. It is understood that the forces will then be divided. A mail steamer that was carrying tor pedoes destined for the defence of Manila has returned to Barcelona.

It is useless for stepped out and struck him with a bar Spain to cherish pleasing illusions, of iron, felling him to the ground. The America will lick her volunteers into a shape good enough for the work in on the scene hastily, but the three men hand, a great deal more quickly than seems to be anticipated in Madrid.'

The Daily News says: "Spain's best friends can only urge her to submit without delay. There is no armor against fate and there is no remedy for incapacity. If international diplomacy deals with war, Lord Salisbury will insist upon a just claim of the United States to secure the rewards of energy and foresight in a good cause.'

FOR INTERVENTION.

Spain Undoubtedly Conferring With the Powers. London, June 10.—The Madrid corre spondent of The Daily Mail says:

"There is now little doubt that Spain, seeing the hopelessness of further continuing the war, is approaching the powers with the view of obtaining an honorable peace. The cabinet council has finally instructed Duke Almodiver de Rio to expedite diplomatic action and in consequence the duke is now conferring with certain ambassadors and

ministers in Madrid.' Instructions have been telegraphed to the Spanish minister in Vienna and orders likewise given Senor Aguera, the under secretary of state to proceed at once to the Austrian capital.

The youth, who is a student at the State University, is held at the county jail.

Johnson Jordan of Topeka and John Harper of Lawrence, negroes of bad reputation, are also under arrest. Both negroes have stated that Collins hired them to kill his father, and that they backed out after accepting his pay. The detectives have recovered jewelry said to have been given by Collins to the negroes, and Jordon has stated that after he weakened Young Collins went away declaring that he would do the killing himself. The elder Collins' life was insured for \$26,000, of which about \$6,500 was in favor of the son.

SYSTEM OF TRADING Prevails Among Prisoners of the Ohio Penitentiary.

Columbus, O., June 10. - Charles Kline, who has attracted notoriety by twice escaping from the steel cage constructed under the penitentiary hospital for Ira Marlatt, has confessed how the watch was secured. He said that he had received the watch from A. P. Duucan, serving a 10-year sentence and employed at the stable. Kiine's story was found to be true, Duncan having received it from Johnny Beall for taking care of his horse, who in turn had received it from A. C. Ady of this city, who was discharged several days ago. The watch was worth about \$2 and Kline had sold it to another prisoner in the glove shops for \$5. The latter complained that there was trafficking in that kind of goods and all indications pointed to a regular system of trading.

An Old Hawaiian Superstition.

The early demonology of the Sandwich Islands regarded the upheaval of he volcano Mauna Loa as caused by the listress of hunger of the long-haired goddess Pele, whose home was at its base. "She asks for food; throw her a pig; more pigs,' was the saying which passed from mouth to mouth on these occasions. Among the other items of misconduct alleged against Queen Lil, t was said that she reverted to this practise of superstition. At her command live pigs, squealing much against their destiny, were thrown into the crater. They would be sufficiently roasted in going down to sayory morsels, satisfying to the rapid appetite of the hungry goddess, and it was believed so to arrest the overflow of the volcano.

Discovered by a Woman Another great discovery has been made, and that too, by a lady in this. Disease fastened its clutches upon her and for seven years she withstood it severest tests, but her vital organs were undermined and death seemed imminent. For thee months she coughed incessantly, and could not sleep. She finally discovered a way to recovery by purchasing of us a bottle of Dr. King's it is only after 'the third peeling that arose and said to Judge Cox: "I am New Discovery for Consumption, and good cork is produced. The part was so much relieved on taking first dose, that she slept all night; and with two bottles, has been absolutely cured Her name is Mrs. Luther Lutz. Thus writes W. C. The Corn Prospect.

Ware & Leland in their weekly letter ay that from five states in the corn belt, the rainfall the past 90 days is reported as more than one-third greater than that for the same time in 1897 Kansas reports the condition as only 79. Many states report less acreage and much poorer condition than a year ago. Our advices report corn crop gen erally very uneven and late, and too much rain. The bears always say there is no good in corn in June-that while t is going through the germinating process it is risky. The bulls say always buy corn the last of June for a good advance, that the weather thi season in July and August will likely be wet and give promise of a short crop and much higher prices.

The Corn Prospect.

Ware & Leland in their weekly letter say that from five states in the corn belt, the rainfall the past 90 days i reported as more than one-third great er than that for the same time in 1897

79. Many states report less acreage and much poorer condition than a year ago. Our advices report corn crop generally very uneven and late, and too much rain. The bears always say there is no good in corn in June-that while it is going through the germinating process it is risky. The bulls say always buy corn the last of June for a good advance, that the weather this season in July and August will likely be wet and give promise of a short crop

and much higher prices. Yellow Jaundice Cured.

Interesting Cork Exhibit.

Charles W. Milhous, the druggist, has in his show window an exhibit of genuine Spanish importations. Though of large proportions it is of light weight. It is a cork exhibit, part of a recent Mrs. Lon King and Miss Ina King purchase of 250 gross of corks, together who have been here on business and with a large piece of cork bark, splenpurchasing goods returned last evening did specimen, two by five feet in dimensions. This cork was imported H. J. Conkling, of Cincinnati, after a from Spain and it seems that in these pleasant business visit to mayor-elect days of war when one hostile nation is bottling up the navy of another Mr. Milhous has taken sides in the matter and is doing his part towards reducing the Spanish supply of corking material.

The cork tree grows in Spain, Portngal and northern Africa and nearly all that we use in this country is imported from Spain. The cork tree is not large generally growing from twenty to forty feet high. The bark on the trees and branches from three to five years old ception of food acquires a fungus appearance, new layers of cellular tissue being formed and the outer parts cracking form distention until they are thrown off in large flakes. Cork intended for the market is stripped off a year or two before it would naturally come away and the process is repeated at intervals from six to eight years. The bar's of young trees and branches is useless and it is only after 'the third peeling that New Discovery for Consumption, and good cork is produced. The part stripped off is not the whole bark, but only the outer layers which have ceased to have any true vitality, and have become an incumbrance to the tree. Its removal therefore when done with proper care, rather promotes the health of the tree which continues to yield crops ef cork for about 150 years.

stories of the appearance of a mystezious warship in Cuban waters floated through the navy department yesterday. The officers quickly condemned them, declaring the belief that if the boats were Spanish they were nothing more than small armed launches and not to be feared by any number of transports convoyed by such fine gunboats as the Helena and Bancroft.

But, when these stories reached the war department they were received with a different spirit. Nothing is more helpless in warfare than an unarmored troop transport full of soldiers. She would fall an easy victim to the smallest gunboat and the soldiers, knowing their weakness in this respect, are loth to undertake to cross the Florida straits until these disagreeable visitors have been removed from the pathway. Without respect to the character of the strange crafts that are said to be dodging the blockaders at Havana, they will be removed from the scene of action in short notice, and it is understood that Sampson has been made acquainted with the situation and will be expected fo redeem his promise to provide safe conduct to the army when called upon. He has ample force to conduct the operations at Santiago to a successful issue and will spare vessels of any power desirable for use in the Florida straits.

It was pointed out by a naval officer that the admiral, since the arrival of the marine battalion on the Panther, has at his disposal what he may regard as a sufficient force of men to capture Santiago even before the troops arrive. The 600 marines on the Panther, added to the marines already with the fleet, would make a total of about 1,500 men. Without impairing the efficiency of his ships Admiral Sampson could spare

1,000 blue jackets for a landing party. and with this total force of 2,500 men (if the insurgents who have been armed the United States government do their share) it seems possible for Sampson to capture Santiago at short notice. There seemed to be a very decided air of expectation last evening among the officials who are acquainted with the government's plans in the campaign that almost warranted a conclusion that an engagement of some kind was taking

SCHLEY'S TRIBUTE.

Hobson's Name Will Live Just as Long as Heroes Are Remembered.

Off Santiago de Cuba, June 10.-Commodore Schley paid a beautiful tribute to the valor of Lieutenant Hobson and the gallant crew of the collier Merrimac as he sat out on the after deck of the flagship Brooklyn, lying five miles off Santiago de Cuba talking with a corsaid to be incarcerated, the commodore spoke as follows:

History does not record an act of finer heroism than that of the gallant men who are prisoners over there. I watched the Merrimac as she made her way to the entrance of the harbor and my heart sank as I saw the perfect hell of fire that fell upon those devoted men. I did not think it was possible one of them could have gone through it alive. They went into the jaws of death. It was Balaklava over again without the means of defense which the light brigade had. Hobson led a forlorn hope without the power to cut his way out. But fortune once favored the brave and I hope he will have the recognition and promotion he deserves. His name will live as long as the heroes of the world are remembered.

SAN JUAN AND SANTIAGO.

Both Cities to Be Attacked About the Same Time.

Washington, June 10.-The war story of the day is that the expedition of 27,000 soldiers, which has sailed from Tampa, will divide on reaching the waters of eastern Cuba, one part (10,000 strong) going with Admiral Sampson to capture ture San Juan, and the other (composed) of 17,000) proceeding to Santiago to cooperate with Commodore Schley. The two cities are to be attacked at about the same time, and the president is confident they will be in the possession of the United States by the middle of next

Both branches of the expedition should reach their respective destinations by Monday if they have smooth sailing and no hitch occurs in the arrangements. Admiral Sampson will leave the heavier part of the fleet at Santiago, but will take with him a suf-

Will Not Be Initiated by Spain, Says Senor Sagasta-Minister of Marine Sent Fleet to Sea - London Press Advises Spain to Recognize the Inevitable.

The cabinet council was occupied with a long discussion as to the military situation in the Philippines. General Correa, minister of war, denied that Captain General Augusti's position was deperate, and Senor Sagasta added that Manila had means of defence until the arrival of reinforcements.

The council then adopted important measures, which are kept secret. Captain Aunon, minister of marine, was authorized to take whatever measures he considers necessary with reference to the Philippines, and Senor Puigcorver, minister of finance, being authorized to come to an agreement with the leaders of the majority in the chamber for the passage of the budget.

Senor Sagasta declared that the government had "no intention of taking the initiative in negotiations for peace.' He said he was not aware that any power was disposed to do so.

Hobson's Ancestry

Richmond Pearson Hobson, the hero of the Merrimac, is the idol of all the world, with the possible exception of a few blindly prejudiced Spaniards. His brave deed wins the applause of the fairminded people seated in the theater of the world while he performed on the stage at Santiago. Hobson comes from fighting stock. His ancestors were brave and daring, probably possessing the same abilities to win fame, but lacking in opportunity. His tather, James M. Hobson, entered the confederate army and fought gallantly all through the war. His grandfather, Richmond Pearson, for whom the latest hero is named, had no occasion to display martial gallantry, but served his country with honor as chief justice of North Carolina for forty years. His greatgrandfather, Col. John Williams, fought wit 1 Andrew Ja; kson as ainst the Britsh at New Orleans and against the panish at Pensacola and was rewarded for distinguished service by election as Muncie to visit friends. United States senator from Tennessee. His greatgreatgrandfather, Msj. Joseph | the guest of Seymour friends. Williams, served in the revolutionary war and at Kings Mountain and Cowpens fought with bravery. Proud as Lieut. Hobson may well be of his ancestors, in all the long line none shine with a brighter lustre than the man who planned and put the cork in the neck of the bottle at Santiago.

Both of the ships named after wives wealth of a nation that can afford to of Alfonso XII. are at the bottom of the sea. The Reina Christina went first at Manila, while the warship named after Alfonso's beautiful cousin and wife, Mercedes, is where Hobson sent the Merrimac. They were both respectable modern ships, built in 1887. of steel, with a speed of 17% knots, and each carried a crew of 375 men.

An Old Hawaiian Superstition.

The early demonology of the Sandwich Islands regarded the upheaval of the volcano Mauna Loa as caused by the distress of hunger of the long-haired base. "She asks for food; throw her a pig; more pigs,' was the saying which passed from mouth to mouth on these occasions. Among the other items of misconduct alleged against Queen Lil, it was said that she reverted to this practise of superstition. At her command live pigs, squealing much against their destiny, were thrown into the crater. They would be sufficiently roasted in going down to sayory morsels, satisfying to the rapid appetite of the hungry goddess, and it was believed so to arrest the overflow of the volcano.

The Corn Prospect.

Ware & Leland in their weekly letter say that from five states in the corn belt, the rainfall the past 90 days is reported as more than one-third greater than that for the same time in 1897 Kansas reports the condition as only 79. Many states report less acreage and much poorer condition than a year ago. Our advices report corn crop generally very uneven and late, and too much rain. The bears always say there s no good in corn in June-that while it is going through the germinating process it is risky. The bulls say always buy corn the last of June for a

good advance, that the weather this season in July and August will likely be wet and give promise of a short crop and much higher prices.

Thomas Arbuckle's Peculiar Condition as a Result of Typhoid Fever-Drowned In Eighteen Inches of Water-Robbed and Thrown From a Train-Famous Indian Springs.

Roachdale, Ind., June 10.—During a severe electrical storm which swept over this city, lightning struck the home of James Smith, the stroke entering at the chimney and going to different parts of the house. The plastering was torn off and the furniture was broken. Four people were in the house at the time, all of whom escaped without special

RESULT OF TYPHOID.

Thomas Arbuckle Compelled to Take Nourishment Trough a Tube.

Scottsburg, Ind., June 10. - Thomas Arbuckle, of this county, is living under peculiar conditions. Last fall all the members of his family were stricken with typhoid fever. His father, mother and two brothers died from the effects of the disease, one of the brothers starving to death because of the closing of the upper orifice of the stomach. The disease left Mr. Arbuckle in about the same condition, though he managed to live on liquid nourishment until about four weeks ago, when the cardiac ori fice of his stomach became closed, since when he has been unable to swallow a drop of anything. He submitted to an operation. His stomach was opened and a valvular incision was made in the apper portion, permitting the introduction of a tube. Through this tube all his nourishment for over three weeks has passed. He takes five meals a day, consisting of milk and broth and has gained 10 pounds in weight. The physicians say it may be months before his stomach is ready for the ordinary reception of food.
